

BOLIVIA TOUR REPORT 2023

23 / 26 September - 15 / 20 October 2023

by János Oláh

Bolivia is a somewhat neglected South American destination and I have no idea why! It is an amazing country with a huge list, just as good infrastructure as Peru and a long list of specialities! It is a land-locked country, but it is the biggest list for any such a country in the world with a total of 1457 bird species recorded, and 17 of those are endemics. Not a very high list of endemics but this is only because many species creeps over the border to Peru, Brazil, or Argentina. However, many of these are way much easier to see in Bolivia, so the actual number of key birds are high and even well-travelled South America listers can see up to 100 new birds! Even so, many people only visit Bolivia once, and our tour is trying to give the most comprehensive visit to this fascinatingly diverse country if you want to go! In 2023 we offered a pre-tour and a post-tour extension to our main tour, and we recorded 729 species, which included a long list of goodies. We also had 27 species of mammals during the tour and Giant Anteater was the highlight followed closely by the Bolivian River Dolphin. This tour has many special birds, but probably Blue-throated and Red-fronted Macaws stand out as the prime target for most visitors! Talking about parrots, they have an amazing diversity in Bolivia, and we recorded a total of 30 species which included 10 species of macaws! Wow! However, we had a wide range of other highly sought-after birds like Huayco and Black-capped Tinamou, Red-faced and Yungas Guans, Razor-billed and Bare-faced Curassows, Stripe-faced Wood Quail, Titicaca Grebe, Scissor-tailed and Spot-tailed Nightjars, White-chested and White-chinned Swifts, Buff-thighed and Blue-capped Pufflegs, Wedge-tailed and White-sided Hillstars, Pheasant Cuckoo, Ocellated Crake, James's Flamingo, Black-and-white Hawk-Eagle, Black-and-chestnut Eagle, Hooded Mountain Toucan, Pale-crested and Cream-backed Woodpeckers, Cliff Parakeet, Black-winged Parrot, Tucuman Amazon, Bolivian Recurvbill, Berlepsch's and Scribble-tailed Canasteros, Black-throated Thistletail, Light-crowned and Ochre-cheeked Spinetails, Upland and Bolivian Slaty Antsrikes, White-throated, Bolivian, Rufous-faced and Masked Antpittas, Slaty Gnateater, Bolivian and Diademed Tapaculos, Yungas Tyrannulet, Yungas Tody-Tyrant, Taczanowski's Ground Tyrant, Palkachupa Cotinga, Scimitar-winged Piha, Andean Slaty Thrush, Bolivian and Rusty-browed Warbling Finches, Orange-browed Hemispingus, Grey-bellied Flowerpiercer, Grey-crested Finch just to name but a few!

Our tour started with a short pre-tour extension around Riberalta in the far north-east corner of the country. The main target of the two-days birding was to track down the Masked Antpitta, a species inhabiting riverine habitat, and which has not been found anywhere else apart from a very restricted area in Bolivia. We wasted no time after arriving to the sweaty lowlands, dropped our bags off in a lovely posada and hit the trails in a nearby gallery forest. Although we noticed a lot of the forest disappeared since our last visit (before covid) but one of our stake-out was still working and we had superb looks of the much-wanted Masked Antpitta in the afternoon light! Fantastic! Pressure off we could plan now what we would do for our full day birding which was not a big

challenge with so many types of habitats available around Riberalta. We were off to some cerrado habitat early next morning where we had an excellent early morning birding with Ocellated Crake, White-eared Puffbird, Rufous-sided Scrub Tyrant and White-rumped Tanager while a proper Amazonian Forest patch nearby produced Cinnamon-throated and Long-billed Woodcreepers, Black-spotted Bare-eye, Band-tailed Antbird and Flammulated Bamboo-Tyrant. In the afternoon we were back to check the river where Orinoco Geese, Tui Parakeet, the local form of White-bellied Seedeater as well as from one single spot four species of nighthawks were seen at dusk. Our last short morning birding was spent on foot on the edge of town where we got cracking looks of Pheasant Cuckoo, Purus Jacamar, Black-tailed Trogon, Johannes's Tody-Tyrant, Bare-necked Fruitcrow, Band-tailed Manakin and Lemon-chested Greenlet. Our swift stay in Riberalta ended and we were off to Beni!

We arrived in Trinidad slightly later than anticipated. Next morning, we still had time for an early morning birding near town before the rest of the group was arriving for the official tour start later in the day. We drove out of town to look at some nearby wetland habitat. This department of Bolivia is one of the most fascinating and bird-rich areas in South America, a bit like the famous Pantanal in Brazil! It never fails to impress, and we had several days to explore the different habitats. Our morning birding was a great introduction, and the most exciting bird was a fine Ash-throated Crake which we lured into view and some migrant Upland Sandpipers. Yet again some delayed flights but eventually the rest of the group has also arrived, and the main tour has started! We drove from the airport to a gallery forest habitat for our first birding in Beni. We drove to an oxbow lake and took a secluded trail into the gallery forest. It was a hot afternoon, and the forest was dry, very dry! As soon as we stepped out of the bus, we saw some Large-billed Terns over the oxbow lake, and we were greeted by Yellow-chevroned Parakeets and a flock of Velvet-fronted Grackles of the local boliviensis race (perhaps Bolivian Grackle one day) on a flowering tree! The next bird we saw was a party of Plain Softtail of the local fusciceps race (perhaps Bolivian Softtail one day). We got great looks of these fast-moving furnarids with such a distinctive song. We continued on a nice wide forest track, where some Bolivian Red Howlers were showing, and we soon found a forest pool where many birds were coming to drink. Decision was made to stay around this spot for the last hour of the day and it was a great decision! Fantastic male Band-tailed Manakins, Grey-fronted Doves, Creamy-bellied and Black-billed Thrushes, Bolivian Slaty Antshrikes, Band-tailed Antbirds, Plush-crested Jays, more Velvet-fronted Grackles, Yellow-rumped Caciques, Grey-headed and Silver-beaked Tanagers and even hummingbirds came to drink. We identified and photographed three species of hermits including the rather scarce Buff-bellied Hermit. The surprise came when it was getting dark, first a Razor-billed Curassow and then a Giant Anteater turned up at the waterhole! How fantastic first afternoon for the tour! On the way out of the forest Common Pauraque, Tropical Screech Owl and feeding Azara's Night Monkeys were seen while Little Nightjar was also tracked down.

We left early next morning towards a hacienda, where we were hoping to find the 'Critically Endangered' Blue-throated Macaw. We arrived just after dawn and walked along a track where we soon spotted the first Blue-throated Macaws. They were backlit but we could see them properly. We also had Greater Rufous Woodcreeper, Red-billed Scythebill, Grey-crested Cacholote, Chotoy Spinetail and Plain Inezia. We drove to a nice lagoon where we enjoyed yet another splendid field breakfast and got to see two more Blue-throated Macaws perched. Superb looks of these top targets, what an amazing experience it was! We also had Cobalt-rumped Parrotlets, Yellow-chevroned, Peach-fronted and Dusky-headed Parakeets, Turquoise-fronted Amazon and Chestnut-fronted Macaws in addition to the two species of yellow and blue coloured species! After breakfast,

the macaw-show finished and after a short detour (to fix a flat tyre) we were heading back to Trinidad seeing Jabirus, Plumbeous Ibises, Black-collared Hawks and many more birds along the way. In the afternoon we were back to a gallery forest in search of Unicolored Thrush but despite much effort only Hauxwell's and Creamy-bellied Thrushes were showing. We had a tame Little Cuckoo, some eye-level Sulphur-bellied Tyrant-Manakins and a party of the rare Rio Beni Titis. It was a great action-packed day in the Llanos de Moxos!

Next morning, we were birding around the Laguna Belen area. Still before it got light, we managed great looks of Spot-tailed Nightjar and some Crab-eating Raccoons. Weather was overcast and there has been rain overnight, so we could bird a long morning session. It was particularly amazing to see eight species of hirundines in a few hours including several Tawny-headed Swallows and many migrant American Cliff Swallows. Throughout the morning we had a great selection of birds like Greater Rheas, numerous Southern Screamers, Jabirus, Maguari Storks, Plumbeous, Buff-necked and Green Ibises and large numbers of herons and egrets. We also saw Sunbittern, Pale-crested Woodpecker, Golden-collared Macaws, White-rumped, Grey and White Monjitas, Yellow-browed Tyrant, Hudson's Black Tyrant on the roadside wires while the sky was full of Lesser Yellow-headed Vultures. Our main target was Great-billed Seedfinch but we could not find any despite extensive search – there were no recent sightings from the area. A nice pair of Long-tailed Reed Finches were found however and Muscovy Ducks, White-browed, Unicolored and Scarlet-headed Blackbirds as well as Screaming Cowbirds and Rusty-collared Seedeaters. In the afternoon yet again, we were back to a gallery forest in search of Unicolored Thrush. This time a different location again but no luck. We probably heard one distant bird near dusk on the other side of an oxbow lake but that was all. New birds at this location included White-chinned Sapphire, Rusty-backed Spinetail, Moustached Wren and a skulking Southern Tamandua on a tree!

Our last morning in the Trinidad area was spent around another lagoon area still in search of the seedfinch but yet again it eluded us. Nacunda Nighthawks, a fine pair of Rufous-sided Crakes, Hoatzin and both Pampa and Wedge-tailed Grass Finches were seen while we could also get excellent looks of White-bellied Seedeaters and a South American Coati. Before the flight to Santa Cruz we still visited the Rio Mamoré where we located Mato Grosso Antbirds and Bolivian River Dolphins. It was time to leave the Beni and head to Santa Cruz. Our connecting flight at Cochabamba was late so it was a rather late arrival to Santa Cruz. Nevertheless, we were up early morning and visited the airport area where we eventually managed to see Red-winged Tinamou and also some of us seen a White-bellied Nothura. On some nearby ponds we had Ringed Teals and also found a Ruff which is the first record of the species in Bolivia and a pretty good South America tick for the keen listers! We still made a short visit to the local botanical garden where we had White-wedged Piculet, Green-cheeked Parakeets and Golden-crowned Warbler before we had to get moving and headed to Los Volcanes to explore the semi-humid foothill forests adjacent to the famous Amboro National Park. The setting of the lodge is spectacular, a little clearing surrounded by forested towering red cliffs, very impressive indeed. Los Volcanes is always a real pleasure to go birding and our visit was no exception. We arrived to the entrance area with our bus and were transferred down towards the lodge with 4x4 cars. The bus stop area gave us an amazing vista to the picturesque valley, and we still had time for a short birding along a newly cut trail. Here we quickly connected with some of our targets like Ochre-cheeked Spinetail, Bolivian 'White-crowned' Tapaculo and Black-capped Antwren. Some of us even got glimpses of a Bare-faced Curassow along the main track and we had about 16 Military Macaws in flight at the end of the day. We settled into our rooms and have the first of many delicious meals in the lovely lodge.

We had two full days to explore this amazing area and we had many exciting birds and great looks of some real goodies! There are several key birds here but probably the most elusive is the scarce and shy Bolivian Recurvbill. They are usually not easy to see but we were delighted to lure one into view on our first day. It showed reasonably well for this species, and everybody was happy! Other highlights included both Brown and Black-capped Tinamous, White-throated Piping Guan, Rufous-breasted Wood Quail, Yungas Dove, Rufescent Screech Owl, Grey-throated Leaf-tosser, Ocellated and Black-banded Woodcreepers, Chestnut-backed Antshrike, Western Fire-eye, Short-tailed Antthrush, several Slaty Gnateaters of both sexes, Sclater's and Buff-barred Tyrannulets, Yungas Manakin and a nice selection of raucous parrots and parakeets. We also had some great encounters with mammals such as Bicolored-spined Porcupine, Spectacled Slender Opossum and Lowland Paca.

It was time to move on and we drove to the nearby Samaipata the following morning and continued to Quirusillas for some afternoon birding. It was quiet around the 'Emerald Lake' but brilliant scenery! After our field lunch we found some feeding Tucuman Amazons in the canopy and had great looks of Mottle-cheeked and Sclater's Tyrannulets side by side. A distant White-throated Antpitta made us bushwack and after much effort we gave up. By the late afternoon we took a small side road and a trail into the bushes which was a great decision with fantastic looks of Ochre-faced Tody-Flycatcher, Sooty-fronted Spinetail, Ocellated Piculet, Pale-legged Warbler, White-browed Brushfinch and eventually a superb White-throated Antpitta! It turned out to be a great afternoon and just as we were to leave the area a Red-faced Guan was spotted by some. It did not stay long enough for everybody to see it but we knew where to return next morning! And sure enough, we were back next morning! Just as it got light, we tracked down a singing Huayco Tinamou which was followed by the tricky-to-find Dot-fronted Woodpecker pair. We also found the Red-faced Guan and this time one perched up for everybody to see it well. Throughout the morning we did very well with our remaining targets which included great looks of White-vented Violet-ear, Buff-browed Foliage-gleaner, Spot-breasted Thornbird, dinelli race of Variable Antshrike, Rufous-capped Antshrike, Bolivian Tyrannulet, Black-and-chestnut and Ringed Warbling Finches, a fantastic pair of Straw-backed Tanagers and best of all a confiding pair of Bolivian Earthcreeper was found by Leo which was a great bonus! In the afternoon we drove to Comarapa but our birding was hampered by gale forced wind. Still, we managed to see Yungas Guan, Red-tailed Comet, Stripe-crowned Spinetail and Pampa Finch.

Siberia was our birding plan for today and some considerable time before dawn we started climbing up to the cloud forests. Unfortunately, weather was grim with gale forced wind and low clouds (mist). Well, I know it can be good in the cloud forest not to have sunshine, but this was a bit too much! The first sign of actual life was two Molina's Hog-nosed (Andean) Skunks walking along the track though we could only see them when they were within 2 meters. A welcome mammal for sure! A cooked breakfast on the field was certainly heart-warming while still only silhouettes of birds were 'visible' but at least we certainly knew the bird like shapes being an Andean Guan, then a White-eared Solitaire and Andean Slaty Thrush. Not good looks. We had a little window with less wind and maybe less mist when we managed to lure Trilling Tapaculo, Rufous-faced Antpitta, Light-crowned Spinetail and Bolivian Brushfinch into view! A quite large mixed flock - which we only saw bits in the mist - had Pearled Treerunner, Mountain Woodcreeper, Buff-banded and White-throated Tyrannulets, Barred Becard and Mountain Wren. Suddenly a male Blue-capped Puffleg showed up and eventually gave stunning looks to all! Despite the horrendous weather we were getting some real goodies and until lunch we still saw Maroon-belted Chat-Tyrant, Plumbeous Tyrant and Rufous-bellied Bush Tyrant as well as got better looks

of a singing Andean Slaty Thrush. In the hope of better weather, we drove even higher and spent considerable time to get the bejaranoi race of the endemic Black-throated Thistletail which eventually most people saw. The weather at higher elevation was not better at all! We descended back into a nice patch of cloud forest and spent the late afternoon in a rather silent cloud forest. The wind was still strong but at least we got some visibility and soon found Pale-footed Swallows as well as Tyrian Metaltail, Speckled Hummingbird, Rust-and-yellow Tanager, Blue-winged (Bolivian) and Chestnut-bellied Mountain Tanagers. It was difficult birding, but Siberia was kind to us and all in all it was a successful bird-packed day!

Next morning, we birded some dryer habitat above Comarapa. In the twilight a Lesser Horned Owl was seen perched on a road sign but quickly disappeared when we put the torch on it. Our first stop in bushy terrain was good, a fantastic Olive-crowned Crescentchest was called in and we could admire this beautiful little bird only a few meters away! A sunlit hillside was chosen for our breakfast spot and there was good activity. While scrambled eggs and other goodies were prepared, we had great looks of the near endemic Grey-bellied Flowerpiercer, Rusty-vented Canastero, Green-barred Woodpecker and Rusty-browed Warbling Finch. A nice male Red-tailed Comet with the long streamers were also seen very well. We left the Comarapa area and drove towards Perereta. As we made our way into progressively drier country dominated by cacti and acacia woodlands, we made a few roadside stops and found Streak-fronted Thornbirds, Greater Wagtail Tyrant, White-tipped Plantcutter and Black-capped Warbling Finches. In the afternoon we arrived at the Lodge run by the local community in the Red-fronted Macaw Reserve. A great initiative started by Armonia to help the macaws and get the local villages and communities involved in eco-tourism. What a place! As soon as we stepped out of the bus, we could scope Red-fronted Macaws on the towering cliff face right from the lodge balcony! After we enjoyed the scope looks of this very top Bolivian target, we settled into our rooms, had a nice coffee, and then made our way closer to the parrot cliff. There are two more Bolivia endemic species found in this arid valley, the Bolivian Blackbird, and the Cliff Parakeet. Naturally these were our targets! We spent a superb hour with around 35 Red-fronted Macaws, hundreds of Cliff Parakeets, Turquoise-fronted Amazons and Mitrred Parakeets. A noisy lot but it was stunning! Back around the lodge Bolivian Blackbirds and Grey-crested Finches showed well and after dinner two male Scissor-tailed Nightjar was tracked down.

Still before breakfast we took our bus to the top of the immense cliff where we were expecting to see the endemic Red-fronted Macaws from a different angle. We had to wait a little bit for the first macaws to fly in as this time of the year they are not roosting on the cliff face. Gradually we made our way down a narrow trail towards the bottom of the cliff. We got excellent perched and flight views of the Red-fronted Macaws and counted as many as 51 birds when they landed to feed on peanuts. No wonder it came on the top on the 'Bird of the Tour' competition! This reserve is likely to be the last stronghold of these magnificent birds as most peripheral populations continue to decline in the face of persecution and trapping for the bird trade. Chaco Puffbirds, Andean Swifts and Southern Martins were also seen along the cliff face. After this macaw experience, we returned for breakfast and from our dining table we could watch a fine selection of birds coming to the feeders such as White-fronted Woodpecker, Creamy-bellied Thrush, Bolivian Blackbird, Sayaca and Blue-and-yellow Tanagers and Grey-crested Finch. It was difficult to drag ourselves away from this location, but we had a long drive to Cochabamba. A few stops produced Cream-backed Woodpecker, Yellow-billed Tit-Tyrant and Brown-backed Mockingbird. Closer to Cochabamba we also visited a high Andean lagoon where Giant Coot, Andean Avocet, Rufous-naped Ground Tyrant and Andean Negrito.

Our first day on the famous Chapare road was misty and wet again. It looked like our unluck with the weather at high altitude cloud forest continued. A massive weather system (the same as in Siberia) was still around the east slope. Nevertheless, we kept trying and we had some great birds. Our first stop by a lagoon was promising as we quickly found Black-hooded Sunbeam and a surprise Stripe-faced Wood Quail. The latter is a seldom seen bird and I believe the mist was helping us to see this shy ground-dwelling species, even though visibility was limited so the views could have been better. Up and down the mountain we were looking for our targets and managed to find Hooded Mountain Toucan, Scaled Metaltail, White-collared Jay, Plushcap and Grey-bellied Flowerpiercer but all in all it was a struggle. We were hoping that on our second day here we will get luckier! We decided to visit Cerro Tunari the next day as it is a dry inter-Andean valley, so even with such weather it should be ok. Our plan worked fine though it was overcast and slight drizzle for the morning we had fantastic time and found all our targets. Highlights included fantastic a male Wedge-tailed Hillstar, Giant Hummingbird, Yungas Pygmy Owl, Striped Woodpecker, Grey-hooded Parakeet, Rock Earthcreeper, Maquis Canastero, Gian Conebill, Cochabamba Mountain Finch, Bolivian Warbling Finch and Rufous-bellied Mountain Tanager. A remarkable selection of goodies and even had time to visit Laguna Alalay in the afternoon. The lagoon was mostly dry, so it was very unusual from our previous visits but there were lots of waders and there were cranes working in the lake-bed – I wonder if the lagoon is getting reduced in size by digging. We counted 562 White-backed Stilts, 225 Baird's Sandpipers, 270 Wilson's Phalaropes and best of all we found a juvenile James's Flamingo in amongst the Chilean Flamingos. A great day yet again! Next day we returned to the Chapare road and this time we had improving weather. We still had to work our way around the mist, but we managed to get great looks of Gould's Inca, Hooded Mountain Toucan, both perched and flight views of Black-winged Parrot, Bolivian Antpitta, Barred Fruiteater, Fulvous Wren and eventually a party of Orange-browed Hemispingus! When the sun came out for a short while a fantastic Black-and-chestnut Eagle gave us a show but also White-rumped, White-throated and Plain-breasted Hawks were seen.

We left Cochabamba behind and made the long drive all the way to Quime. After an early start we made a few roadsides stops where saw Aplomado Falcon, Andean Hillstar, White-winged Cinclodes, Spot-billed and White-browed Ground Tyrant. Our brief lunch-stop near the almost totally dry Lake Uru Uru yielded our first Crested Ducks, Andean Geese, more Andean Avocets and nice Puna Plovers. Flamingos were mostly distant but another juvenile James's Flaming was seen. We continued our journey in the afternoon with more roadside stops where new birds were found like Cordilleran Canastero, Ornate Tinamou, Cinereous Ground Tyrant, Band-tailed Sierra Finch and Glacier Finch while some high puna lakes held Silvery Grebes, Baird's Sandpipers and Wilson's Phalaropes. In the late afternoon on our last roadside stop we found a surprise male White-sided Hillstar which is an austral migrant and rather scarce this far north. Eventually we descended into a deeply incised valley and arrived to Quime for the night. Early next morning we were off to Inquisivi, a rather infrequently visited region but special for birdwatchers! In some dry deciduous woodlands below the village is the place where Schoerd Mayer first found the Bolivian Spinetail. It looks as if this endemic species is more or less restricted to this rather small area. There is one more place where it has been found but not seen there recently. We barely got out of the bus when we heard Bolivian Spinetail singing and saw the birds within minutes of arrival and in the next 30 minutes until breakfast we had repeated excellent looks. It was easy to see but one must come as far as this place to see these rather neat looking spintails. They love to feed amongst the lichen and tillandsia covered branches. We spent some more time in this habitat and got to see Spot-winged Piegeons, Striped Woodpecker, the local yellow-winged flavoptera race of the Green-cheeked Parakeets, Brown-capped Whitestart, Golden-rumped Euphonia, Rusty Flowerpiercer,

Ringed Warbling Finch and Black-backed Grosbeak. The local form of Fuscous Flycatcher was only seen by some. It is however, a very limited habitat and we quickly took our leave and began to retrace our steps to devote more time to the puna grasslands and upland bogs on our way to La Paz. Our lunch-stop on the climb up gave us Black-hooded Sunbeam, Buff-breasted Earthcreeper, Streak-backed Canastero, White-fronted, Taczanowski's and White-fronted Ground Tyrants, Andean Swallow and Black Siskin. Our search for tinamous on a grassy slope was only partly successful as we spotted about six Ornate Tinamous while Darwin's Nothura remained heard-only. We still had a long drive, so we had to quit. It was late by the time we arrived at our comfortable hotel in La Paz.

The following day was yet another epic birding day from 4500 meter down to 1500 meter on the old Coroico road aka the 'death road'. Our first stop was for a roadside Ornate Tinamou before we got to La Cumbre where we birded at 4500 meter in the first ray of sunshine. We had Giant Coots, Andean Lapwings, Puna and White-fronted Ground Tyrants, Glacier Finches and a superb Rufous-bellied Seedsnipe. The seedsnipe was obliging and not concerned by our presence so we could watch it as long as we wanted. Brilliant! Our next stop further down gave us a singing Scribble-tailed Canastero. As we go to Chuspipata the weather yet again deteriorated nevertheless we found Diadem Tapaculo, the nominate race of Black-throated Thistletail and Hooded Mountain Toucan in the thick mist. Going lower still we got below the clouds and the 'death road' was clear. The temperate forest of this road is quite superb, in Bolivia, pristine forests stretch in every direction from the main highway. We had a great morning with superb 'flock birding' and found Sickle-winged Guan, Blue-banded Toucanet, Versicolored Barbet, Yungas Pygmy Owl, Tyrannine, Strong-billed and Olive-backed Woodcreepers, Bolivian Tyrannulet and a great variety of tanagers. Our main target however, the Scimitar-winged Piha proved to be elusive and only a few of us managed to get on a skittish bird. After a delicious field lunch again, our search continued. We had great looks of White-eared Solitaire and Chestnut-crested Cotinga and when we were giving up an obliging Scimitar-winged Piha was found, and we all got terrific looks. Superb! Big smiles all around we continued birding the lowest part of the road where Yungas Warbler and the rare Buff-thighed Puffleg stole the show! The next morning we birded the lower elevation Chairó road. Best birds were Upland Antshrike, McConnell's Flycatcher, Andean Cock-of-the-Rock, Bronze-green Euphonia, Riverbank Warbler and as a rarity Lemon-browed Flycatcher (probably the third record for Bolivia). After lunch it was time to move on and we drove back to the Pongo Valley before we drove through La Paz and the unending sprawl of El Alto to Lake Titicaca.

On our final morning of the main tour we headed to Sorata in search of yet another endemic bird, the Berlepsch's Canastero. Roadside Ornate Tinamou family was our first stop again and then the search for the canastero started. It was hard work; we could not locate the bird for some time so we split up and eventually Leo and Carlos our driver found the Berlepsch's Canastero and we all got good looks while having coffee and biscuits! It is a distinctly different looking canastero even though it does not look very much like in the books. Other birds in the area included Black-hooded Sunbeam, Green-tailed Trainbearer, Andean Flicker, White-crested Elaenia, Brown-capped Tit-Spinetail and Black-throated Flowerpiercer. Following our success, we drove back towards Lake Titicaca and as every tour participant was continuing on the Palkachupa Cotinga extension we made our way towards Escoma. While having lunch our bus was fixed and we quickly continued towards Charazani. It was a long high road again passing at 4640 meter and yet again we made a few roadside stops seeing Giant Coots, Common and Puna Miners and several Common Mountain Viscachas.

Next morning, we embarked on the bumpy drive towards Apolo, but we were hoping to do some birding in Yungas Forest. We left Charazani in the dark and soon found Band-winged and Lyre-tailed Nightjars lower down the valley. Our breakfast break produced White-tipped Swifts, the atriceps race of Crimson-mantled Woodpecker and the aspersiventer race of Variable Antshrike. The rest of the day was also spent driving and stopping at various good-looking habitats. The forest was dry, and the roadside was dusty as well as there were lots of fires going all around us – the inevitable change along this road was shocking and depressing. Most of the fires are to make place for more coca growing which is encouraged by the government. The roadside birding was different from my previous tour here before covid. Our best birds were Black-throated Toucanet, Yungas Tody-Tyrant and Bolivian Tyrannulet. When we were getting closer to Apolo in the late afternoon the habitat changed, and we arrived at wet savannah with forest fragments. Our first roadside stop yielded the rather localised Yungas Tyrannulet and slightly further we stopped to check some swifts and it was a great decision as we found not only the common White-collared and Chestnut-collared Swifts but the rare White-chested and White-chinned Swifts too! Both of these rare birds only have a handful of Bolivian records, and we took pictures for good documentation! We were certainly exhausted after the bumpy driving when we arrived to Apolo. Our accommodation was in a local monastery with basic but immaculate rooms and the food was produced from their own garden!

Early morning, we were on our way to a nearby settlement called Atén and then slightly further on to a good-looking forest patch. We walked the track and scanned for Palkachupa Cotinga but we could not locate any at first. There were a few nice birds perched on dead twigs like Scaled Pigeon, White-eared Puffbirds, Yellow-tufted Woodpeckers, Blue-headed Parrots, Masked Tityras and of course many Tropical Kingbirds. We took a small side trail into another hidden valley but still no luck. Our driver Carlos was waving to us that breakfast is ready, so we returned to the bus, but Leo stayed behind by a fruiting tree. We barely started eating our fruits and cereals when he was waving us back, so we run! Yesssss, it was the call we were all hoping, he found Palkachupa Cotingas as well as a pair of Green-capped Tanagers. It was such a joy to watch six Palkachupa Cotingas of both sexes and a pair of Green-capped Tanagers! Two very localised and smart-looking birds! We just stood there soaking in the birding moment in the early morning sunlight, totally forgetting about our breakfast! After this fantastic morning and the great success, we decided to make a long drive and check out the Machariapo Valley in the afternoon. This is the area where the rare Inti Tanager is regularly seen but it is about two hours drive from Apolo. When we left there were towering clouds and lots of lightning. It was great to see the area and recce out the best stretches for the next day, but the afternoon was quiet. We did see Black-and-white Hawk Eagle, Black-banded and Inambari Woodcreepers, Black-capped Antwren, Rufous Casiornis and Hooded Tanager but no sign of Inti. Some of us even had Black-capped Tinamou crossing the road. On our way back to base we encountered a flashflood at one of the stream crossings and we had to wait hours before the water level dropped enough to cross it safely. So yet again it was late when we got back to the Nunnery.

Our next full day was spent in the Machariapo Valley in search of the Inti Tanager. Despite our hard work and struggle with all the sweat bees we did not see this holy grail bird. We did hear it in the morning, sometimes promisingly close but never close enough to see it. I believe you need to come across this bird in a mixed feeding flock as those few singing birds don't seem to react to tape at all regardless how cautious you are (we were!). Throughout the day we had some great birds like Blue-tailed Emerald, Dark-billed Cuckoo, Bat Falcon, Hook-billed Kite, Bluish-fronted Jacamar, Bar-breasted Piculet, Red-strained Woodpecker, Upland Antshrike, Wing-barred Pipit, and

White-bellied Pygmy Tyrant, White-rumped Sirystes, Scarlet Tanager and Chestnut-vented Conebill. In the late afternoon we heard the Inti Tanager once more but much more distantly, so we had to accept defeat and drive back to Apolo. The last full day of the tour was the long drive back to Charazani. We planned our drive so we could bird the morning in the most promising habitat along the road. This was not far from Apolo and we had a great morning with some amazing birds! Best of all was yet another Bolivian Recurvbill which gave absolutely fantastic looks – it was a great catch up for some – as long as we wanted! Other goodies included Reddish Hermit, Eastern Woodhaunter, Cabanis's Spinetail, Western Fire-eye, Yungas Tody-Tyrant, Amazonian Umbrellabird, Fiery-capped and Round-tailed Manakins and Masked Tanager. We were back to the Charazani River Valley for for the afternoon and slowly climbed back to Charazani. There were not many new birds for us, but we did see Mottle-backed Elaenia on our lunch-stop and many Torrent Ducks at higher elevation. Gould's Inca, White-winged Black Tyrant, Maroon-belted Chat-Tyrant and White-crested and Sierran Elaenias were seen at higher elevation.

On our last day we had a longish drive through high elevation from Charazani to Lake Titicaca. Here we still had an important bird to get, so we drove straight to the lakeside and quickly found several Titicaca Grebes. We could watch a family of these flightless grebes as the parents were feeding the youngsters. They are very nice grebes! There were many Puna and Yellow-billed Teals, Andean Ducks, Andean Coots and in the lakeside vegetation we found Wren-like Rushbird, Many-colored Rush Tyrant and Yellow-winged Blackbird to complete the set of goodies. It was a great ending to our action packed and successful tour to Bolivia! We had a final nice lunch and then drove to La Paz airport. As I mentioned it at the beginning of the report Bolivia is a very nice and safe country to travel and has an amazing diversity of birds, a perfect South America destination especially for those who like parrots and high Andean birding! Our group was keen, persistent, and easy going, thanks for all to join us to Bolivia and hope to see you again! I also would like to say thank you to my fellow leader Leo Garrigues for his tireless enthusiasm of finding birds and helping this tour all along! I am proud we have such amazing young generation guides at Birdquest! I would also like to say thank you for our hard-working ground team, to our guide Raul, our driver Carlos and our cook.

BIRD OF THE PRE-TOUR EXTENSION

1st: Masked Antpitta

2nd: White-rumped Tanager

3rd: Ocellated Crake & Pheasant Cuckoo

BIRDS OF THE TOUR

1st: Red-fronted Macaw

2nd: Blue-throated Macaw

3rd: Scimitar-winged Piha

4th: Hooded Mountain Toucan

5th: Straw-backed Tanager

BIRDS OF THE POST-TOUR EXTENSION

1st: Palkachupa Cotinga

2nd: Green-capped Tanager

3rd: Bolivian Recurvebill

SYSTEMATIC LIST OF SPECIES RECORDED DURING THE TOUR

Species marked with the diamond symbol (◊) are either endemic to the country or local region or considered 'special' birds for some other reason (e.g., it is only seen on one or two Birdquest tours; it is difficult to see across all or most of its range; the local form is endemic or restricted-range and may in future be treated as a full species).

The species names and taxonomy used in the bird list follows Gill, F., Donsker, D., & Rasmussen, P. (Eds). **2023. IOC World Bird List (v13.2)** (this was the current version when the checklist for the tour report was created).

Where the subspecies seen is/are known, these are often given in parentheses at the end of the species comment.

Species which were heard but not seen are indicated by symbol (H).

Species which were only recorded by the leader are indicated by the symbol (LO).

Species which were not personally recorded by the leader are indicated by the symbol (NL).

BIRDS

Greater Rhea *Rhea americana*

Grey Tinamou *Tinamus tao* heard-only

Cinereous Tinamou *Crypturellus cinereus* One was seen near Riberalta on the extension.

Brown Tinamou *Crypturellus obsoletus* Great looks at Los Volcanes.

Undulated Tinamou *Crypturellus undulatus* Regularly seen around Riberalta and also at Trinidad.

Black-capped Tinamou *Crypturellus atrocapillus* One seen at Los Volcanes and one in the Machariapo Valley.

Small-billed Tinamou *Crypturellus parvirostris* Leader-only near Riberalta on the extension.

Tataupa Tinamou *Crypturellus tataupa* One was seen by some in the Machariapo Valley.

Red-winged Tinamou ♦ *Rhynchotus rufescens* It was seen at Santa Cruz airport.

Huayco Tinamou ♦ *Rhynchotus maculicollis* Great looks at Quirusillas.

Ornate Tinamou *Nothoprocta ornate* Several excellent looks. A total of 14 were seen at high elevation.

White-bellied Nothura ♦ *Nothura boraquira* One was seen at Santa Cruz airport.

Darwin's Nothura ♦ *Nothura darwinii* heard-only

Southern Screamer *Chauna torquata*

White-faced Whistling Duck *Dendrocygna viduata*

Black-bellied Whistling Duck *Dendrocygna autumnalis*

Torrent Duck *Merganetta armata* Up to 19 were seen below Charazani on the extension.

Orinoco Goose *Neochen jubata* A pair with chicks were seen on the Beni River near Riberalta on the extension.

Andean Goose *Chloephaga melanoptera*

Muscovy Duck *Cairina moschata*

Ringed Teal *Calonetta leucphrys* Six were seen at Santa Cruz airport. A write-in on the current itinerary.

Brazilian Teal *Amazonetta brasiliensis*

Crested Duck *Lophonetta specularioides*

Puna Teal *Spatula puna*

Red Shoveler *Spatula platalea*

Cinnamon Teal *Spatula cyanoptera*

White-cheeked Pintail *Anas bahamensis*

Yellow-billed Pintail *Anas georgica*

Yellow-billed Teal *Anas flavirostris*

Andean Duck *Oxyura ferruginea*

Speckled Chachalaca *Ortalis guttata*

Andean Guan *Penelope montagnii*

Red-faced Guan ♦ *Penelope dabbenei* A total of six were seen at Quirusillas.

Spix's Guan ◊ *Penelope jacquacu* Seen twice near Trinidad.

Yungas Guan ◊ *Penelope bridgesi* We only had one sighting of five birds near Agua Clara.

Sickle-winged Guan *Chamaepetes goudotii* Three were seen along the old Coroico (death) road.
Rare bird!

White-throated Piping Guan ◊ *Pipile grayi* Regular sightings around Beni and at Los Volcanes.

Razor-billed Curassow ◊ *Mitu tuberosum* A super surprise sighting of one near Trinidad.

Bare-faced Curassow *Crax fasciolata* A female was seen at Los Volcanes. **VU**

Rufous-breasted Wood Quail *Odontophorus speciosus* Great looks at Los Volcanes!

Stripe-faced Wood Quail ◊ *Odontophorus balliviani* Fantastic to see this seldom-seen bird at the Chaparre Road.

Nacunda Nighthawk *Chordeiles nacunda* It was seen around Riberalta and near Trinidad.

Sand-coloured Nighthawk *Chordeiles ruperstris* It was a write-in at Riberalta on the extension.

Lesser Nighthawk *Chordeiles acutipennis* It was seen at Riberalta on the extension.

Band-tailed Nighthawk *Nyctiprogne leucopyga* It was a write-in at Riberalta.

Pauraque *Nyctidromus albicollis* Common.

Lyre-tailed Nightjar *Uropsalis lyra* One male was seen below Charazani on the extension.

Little Nightjar *Setopagis parvula* It was seen well near Trinidad.

Band-winged Nightjar *Systellura longirostris* One was seen below Charazani on the extension.

Spot-tailed Nightjar *Hydropsalis maculicaudus* Great looks of this smart-looking one near Trinidad.

Scissor-tailed Nightjar ◊ *Hydropsalis torquate* Fantastic bird, seen well at the Mizque Valley.

Rufous Nightjar *Antrostomus rufus* heard-only

Great Potoo *Nyctibius grandis*

Common Potoo *Nyctibius griseus*

White-chested Swift ◊ *Cypseloides lemosi* A magical mixed flock had at least 3 birds near Apolo on the extension.

White-chinned Swift ◊ *Cypseloides cryptus* A magical mixed flock had at least 10 birds near Apolo on the extension.

Chestnut-collared Swift *Streptoprocne rutila*

White-collared Swift *Streptoprocne zonaris*

Grey-rumped Swift *Chaetura cinereiventris*

White-tipped Swift *Aeronautes montivagus*

Andean Swift *Aeronautes andecolus*

Fork-tailed Palm Swift *Tachornis squamata*

Rufous-breasted Hermit *Glaucis hirsutus*

Reddish Hermit *Phaethornis ruber*

Buff-bellied Hermit ♦ *Phaethornis subochraceus* One was seen near Trinidad.

Great-billed Hermit *Phaethornis malaris*

Green-fronted Lancebill *Doryfera ludovicae*

Lesser Violetear *Colibri cyanotus*

Sparkling Violetear *Colibri coruscans*

White-vented Violetear ♦ *Colibri serrirostris* Two were seen in Samaipata.

Horned Sungem *Heliactin bilophus* Two brief leader-only sightings near Riberalta on the extension.

Black-throated Mango *Anthracothorax nigricollis*

Amethyst-throated Sunangel *Heliangelus amethysticollis*

Speckled Hummingbird *Adelomyia melanogenys*

Long-tailed Sylph *Agelaiocercus kingii*

Red-tailed Comet ♦ *Sappho sparganurus* We had several excellent sightings of male with those pretty tail.

Andean Hillstar *Oreotrochilus estella*

White-sided Hillstar ♦ *Oreotrochilus leucopleurus* A surprise find of a fine male near Quime. A write-in for the tour.

Wedge-tailed Hillstar ♦ *Oreotrochilus adela* Fantastic looks this year near Cochabamba.

Green-tailed Trainbearer *Lesbia nuna*

Tyrian Metaltail *Metallura tyrianthina*

Scaled Metaltail ♦ (Reddish M) *Metallura [aeneocauda] malagae* One was seen by some along the Chapare Road.

Buff-thighed Puffleg ♦ *Haplophaedia assimilis* Great find of a male along the old Coroico (death) Road. Rare bird!

Blue-capped Puffleg ♦ *Eriocnemis glaucopoides* Super looks of this tricky bird at Siberia. A fantastic male!

Black-hooded Sunbeam ♦ *Aglaeactis pamela* Endemic. Many excellent looks in the high Andes.

Bronzy Inca *Coeligena coeligena*

Gould's Inca ♦ *Coeligena inca* Several were seen along the Chapare Road and below Charazani.

Violet-throated Starfrontlet ♦ (Bolivian S) *Coeligena violifer* Many great sightings, first seen in Siberia.

Great Sapphirewing *Pterophanes cyanopterus*

Giant Hummingbird *Patagona gigas*

Amethyst Woodstar *Calliphlox amethystine* Two were seen along the Chairó Road.

White-bellied Woodstar *Chaetocercus mulsant*

Blue-tailed Emerald *Chlorostilbon mellisugus*

Glittering-bellied Emerald *Chlorostilbon lucidus*

Fork-tailed Woodnymph *Thalurania furcata*

Golden-tailed Sapphire *Chrysuronia oenone*

Glittering-throated Emerald *Chionomesa fimbriata*

Sapphire-spangled Emerald *Chionomesa lactea*

Gilded Sapphire *Hylocharis chrysura*

White-bellied Hummingbird *Elliotomyia chionogaster*

White-chinned Sapphire *Chlorestes cyanus*

Guira Cuckoo *Guira guira*

Greater Ani *Crotophaga major*

Smooth-billed Ani *Crotophaga ani*

Striped Cuckoo *Tapera naevia*

Pheasant Cuckoo ♦ *Dromococcyx phasianellus* Great looks of this often shy bird near Riberalta on the extension.

Little Cuckoo *Coccyua minuta*

Squirrel Cuckoo *Piaya cayana*

Dark-billed Cuckoo *Coccyzus melacoryphus*

Rock Dove (introduced) *Columba [livia] domestica*

Scaled Pigeon *Patagioenas speciosa*

Picazuro Pigeon *Patagioenas picazuro*

Spot-winged Pigeon *Patagioenas maculosa*

Band-tailed Pigeon *Patagioenas fasciata*

Pale-vented Pigeon *Patagioenas cayennensis*

Plumbeous Pigeon *Patagioenas plumbea*

Ruddy Pigeon *Patagioenas subvinacea* heard-only

Ruddy Ground Dove *Columbina talpacoti*

Picui Ground Dove *Columbina picui*

Blue Ground Dove *Claravis pretiosa*

Bare-faced Ground Dove *Metriopelia ceciliae*

Black-winged Ground Dove *Metriopelia melanoptera*

White-tipped Dove *Leptotila verreauxi*

Yungas Dove ♦ *Leptotila megalura* Several sightings, first good looks at Los Volcanes.

Grey-fronted Dove *Leptotila rufaxilla*

White-throated Quail-Dove *Zenrygon frenata* It was seen along the Chapare Road.

Eared Dove *Zenaida auriculata*

Ash-throated Crane *Mustelirallus albicollis* One was seen by some near Trinidad.

Grey-cowled Wood Rail *Aramides cajaneus*

Common Gallinule *Gallinula galeata*

Giant Coot *Fulica gigantea*

Andean Coot (Slate-colored C) *Fulica ardesiaca*

Purple Gallinule *Porphyrio martinica*

Ocellated Crane ♦ (M, E) *Micropygia schomburgkii* One was seen near Riberalta on the extension.

Rufous-sided Crane *Laterallus melanophaius*

Limpkin *Aramus guarauna*

Least Grebe *Tachybaptus dominicus*

Pied-billed Grebe *Podilymbus podiceps*

White-tufted Grebe *Rollandia rolland*

Titicaca Grebe ♦ *Rollandia microptera* We counted 37 birds at Lake Titicaca, adults and juveniles. Superb! EN

Silvery Grebe *Podiceps occipitalis* Southern *occipitalis* race was seen along the Chapare Road while northern *juninensis* was observed at La Cumbre.

Chilean Flamingo *Phoenicopterus chilensis*

James's Flamingo ♦ *Phoenicoparrus jamesi* A juvenile was seen at Laguna Alalay at Cochabamba and another juvenile at Lake Uru Uru near Oruro.

White-backed Stilt *Himantopus melanurus*

Andean Avocet *Recurvirostra andina*

Southern Lapwing *Vanellus chilensis*

Andean Lapwing *Vanellus resplendens*

Collared Plover *Charadrius collaris*

Puna Plover *Charadrius alticola*

Pied Plover *Hoploxypterus cayanus*

Wattled Jacana *Jacana jacana*

Rufous-bellied Seedsnipe *Attagis gayi*

Upland Sandpiper *Bartramia longicauda*

Ruff *Calidris pugnax* NEW bird for Bolivia. We found one at Viru Viru airport. A good SA tick!

Stilt Sandpiper *Calidris himantopus*

Baird's Sandpiper *Calidris bairdii*

Least Sandpiper *Calidris minutilla*

Pectoral Sandpiper *Calidris melanotos*

Wilson's Phalarope *Phalaropus tricolor*

Spotted Sandpiper *Actitis macularius*

Lesser Yellowlegs *Tringa flavipes*

Greater Yellowlegs *Tringa melanoleuca*

Black Skimmer *Rynchops niger*

Andean Gull *Chroicocephalus serranus*

Yellow-billed Tern *Sternula superciliaris*

Large-billed Tern *Phaetusa simplex*

Sunbittern *Eurypyga helias*

Wood Stork *Mycteria americana*

Jabiru *Jabiru mycteria*

Maguari Stork *Ciconia maguari*

Neotropic Cormorant *Nannopterum brasilianum*

Plumbeous Ibis ♦ *Theristicus caerulescens* Common around Trinidad.

Buff-necked Ibis *Theristicus caudatus*

Andean Ibis ♦ *Theristicus branickii* It was seen at La Cumbre and again further north.

Green Ibis *Mesembrinibis cayennensis*

Bare-faced Ibis *Phimosus infuscatus*

Puna Ibis *Plegadis ridgwayi*

Roseate Spoonbill *Platalea ajaja*

Rufescent Tiger Heron *Tigrisoma lineatum*

Black-crowned Night Heron *Nycticorax nycticorax*

Striated Heron *Butorides striata*

Western Cattle Egret *Bubulcus ibis*

Cocoi Heron *Ardea cocoi*

Great Egret *Ardea alba*

Capped Heron *Pilherodius pileatus*

Whistling Heron *Syrigma sibilatrix*

Snowy Egret *Egretta thula*

Hoatzin *Opisthocomus hoazin*

Andean Condor *Vultur gryphus* VU

Black Vulture *Coragyps atratus*

Turkey Vulture *Cathartes aura*

Lesser Yellow-headed Vulture *Cathartes burrovianus*

Greater Yellow-headed Vulture *Cathartes melambrotus*

Hook-billed Kite *Chondrohierax uncinatus*

Swallow-tailed Kite *Elanoides forficatus*

Black-and-white Hawk-Eagle ♦ *Spizaetus melanoleucus* One was seen in the Machariapo Valley on the extension.

Black-and-chestnut Eagle ♦ *Spizaetus isidori* Amazing views along the Chapare Road. **EN**

Plain-breasted Hawk *Accipiter ventralis*

Long-winged Harrier *Circus buffoni*

Plumbeous Kite *Ictinia plumbea*

Black-collared Hawk *Busarellus nigricollis*

Snail Kite *Rostrhamus sociabilis*

Crane Hawk *Geranoospiza caerulescens*

Savanna Hawk *Buteogallus meridionalis*

Great Black Hawk *Buteogallus urubitinga*

Roadside Hawk *Rupornis magnirostris*

Roadside Hawk ♦ (Chaparral H) *Rupornis [magnirostris] saturates* The form which was commonly seen on the tour.

Harris's Hawk *Parabuteo unicinctus*

White-rumped Hawk *Parabuteo leucorrhous*

White-tailed Hawk *Geranoaetus albicaudatus*

Variable Hawk *Geranoaetus polyosoma*

Black-chested Buzzard-Eagle *Geranoaetus melanoleucus*

White-throated Hawk *Buteo albigula*

Burrowing Owl *Athene cunicularia*

Yungas Pygmy Owl ♦ *Glaucidium bolivianum* Fantastic looks near Cochabamba.

Ferruginous Pygmy Owl *Glaucidium brasilianum*

Lesser Horned Owl *Bubo magellanicus*

Tropical Screech Owl *Megascops choliba*

Rufescent Screech Owl *Megascops ingens*

Band-bellied Owl ♦ *Pulsatrix melanota* heard-only

Crested Quetzal *Pharomachrus antisanus*

Black-tailed Trogon *Trogon melanurus*

Green-backed Trogon *Trogon viridis*

Blue-crowned Trogon *Trogon curucui*

Masked Trogon *Trogon personatus*

Amazon Kingfisher *Chloroceryle amazona*

Green Kingfisher *Chloroceryle americana*

Ringed Kingfisher *Megaceryle torquata*

Amazonian Motmot *Momotus momota*

Purus Jacamar ♦ *Galbalcyrhynchus purusianus* A few were seen around Riberalta on the extension.

Rufous-tailed Jacamar ♦ *Galbula ruficauda*

Bluish-fronted Jacamar *Galbula cyanescens*

White-eared Puffbird *Nystalus chacuru*

Chaco Puffbird *Nystalus striatipectus*

Black-fronted Nunbird *Monasa nigrifrons*

Yellow-billed Nunbird *Monasa flavirostris*

Swallow-winged Puffbird *Chelidoptera tenebrosa*

Versicolored Barbet *Eubucco versicolor*

Black-throated Toucanet *Aulacorhynchus atrogularis*

Blue-banded Toucanet *Aulacorhynchus coeruleicinctis*

Chestnut-eared Aracari *Pteroglossus castanotis*

Hooded Mountain Toucan ♦ *Andigena cucullata*

Channel-billed Toucan *Ramphastos vitellinus*

Toco Toucan *Ramphastos toco*

White-throated Toucan (Cuvier's T) *Ramphastos [tucanus] cuvieri*

Bar-breasted Piculet *Picumnus aurifrons*

Ocellated Piculet ♦ *Picumnus dorbignyanus* Two were seen near Quirusillas and another along the Chairó Road.

White-wedged Piculet *Picumnus albosquamatus*

White Woodpecker *Melanerpes candidus*

Yellow-tufted Woodpecker *Melanerpes cruentatus*

White-fronted Woodpecker *Melanerpes cactorum*

Little Woodpecker *Veniliornis passerinus*

Dot-fronted Woodpecker ♦ *Veniliornis frontalis* Tricky bird to find in Bolivia. We saw a pair at Quirusillas.

Striped Woodpecker ♦ *Veniliornis lignarius* Great looks near Cochabamba and Inquisivi.

Bar-bellied Woodpecker *Veniliornis nigriceps*

Red-stained Woodpecker *Veniliornis affinis*

Golden-green Woodpecker *Piculus chrysochloros*

Golden-olive Woodpecker *Colaptes rubiginosus*

Crimson-mantled Woodpecker *Colaptes rivolii* It is the distinctive *atriceps* race we saw.

Green-barred Woodpecker *Colaptes melanochloros* leader only

Green-barred Woodpecker ♦ (Golden-breasted W) *Colaptes [melanochloros] melanolaimus*
Three nice sightings.

Andean Flicker *Colaptes rupicola*

Campo Flicker *Colaptes campestris*

Pale-crested Woodpecker ♦ *Celeus lugubris* Great looks of a female near Trinidad.

Lineated Woodpecker *Dryocopus lineatus*

Crimson-crested Woodpecker *Campephilus melanoleucos*

Cream-backed Woodpecker ♦ *Campephilus leucopogon* A pair was seen very well on our way to Cochabamba.

Mountain Caracara *Phalcoboenus megalopterus*

Crested Caracara *Caracara plancus*

Yellow-headed Caracara *Milvago chimachima*

Laughing Falcon *Herpetotheres cachinnans*

Barred Forest Falcon *Micrastur ruficollis*

Collared Forest Falcon *Micrastur semitorquatus* heard-only

American Kestrel *Falco sparverius*

Aplomado Falcon *Falco femoralis*

Bat Falcon *Falco ruficularis*

Peregrine Falcon *Falco peregrinus* One near Apolo, scarce bird in Bolivia.

Grey-hooded Parakeet ♦ *Psilopsiagon aymara* Best looks were at Cerro Tunari near Cochabamba.

Cliff Parakeet ♦ *Myiopsitta luchi* Endemic. Fantastic looks in the Red-fronted Macaw Reserve near Mizque.

Tui Parakeet *Brotogeris sanctithomae*

Yellow-chevroned Parakeet *Brotogeris chiriri*

Cobalt-winged Parakeet *Brotogeris cyanoptera*

Black-winged Parrot ♦ *Hapalopsittaca melanotis* Several sightings along the Chapare Road. Gradually getting better and better looks! Special one!

Scaly-headed Parrot *Pionus maximiliani*

Plum-crowned Parrot *Pionus tumultuosus* leader only

Blue-headed Parrot *Pionus menstruus*

Tucuman Amazon ♦ *Amazona tucumana* We got superb looks at Qurisillas! **VU**

Yellow-crowned Amazon *Amazona ochrocephala*

Turquoise-fronted Amazon *Amazona aestiva*

Scaly-naped Amazon *Amazona mercenarius*

Cobalt-rumped Parrotlet *Forpus xanthopterygius*

Green-cheeked Parakeet *Pyrrhura molinae* Three races seen: *molinae*, *restricta* and *flavoptera*.

Peach-fronted Parakeet *Eupsittula aurea*

Dusky-headed Parakeet *Aratinga weddellii*

Red-bellied Macaw *Orthopsittaca malinatus* leader only

Golden-collared Macaw ♦ *Primolius auricollis* Several sightings in the Trinidad area. Beautiful!

Blue-and-yellow Macaw *Ara ararauna* Several sightings in the Trinidad area.

Blue-throated Macaw ♦ *Ara glaucogularis* Endemic. Eventually we got great looks of the rare bird. CR

Chestnut-fronted Macaw *Ara severus*

Red-fronted Macaw ♦ *Ara rubrogenys* Endemic. What an amazing experience we had. Fantastic! CR

Military Macaw ♦ *Ara militaris* Good sightings in Los Volcanes. Counted up to 25 at one time.

Scarlet Macaw *Ara macao*

Red-and-green Macaw *Ara chloropterus*

Red-shouldered Macaw *Diopsittaca nobilis*

Blue-crowned Parakeet ♦ *Thectocercus acuticaudatus* We got excellent look at Quirusillas.

Mitred Parakeet *Psittacara mitratus*

White-eyed Parakeet *Psittacara leucophthalmus*

Grey-throated Leaf-tosser *Sclerurus albigularis*

Common Miner *Geositta cunicularia*

Puna Miner *Geositta punensis*

Olivaceous Woodcreeper *Sittasomus griseicapillus* Two races seen: *griseicapillus* and *viridis*.

Tyrannine Woodcreeper *Dendrocincla tyrannina*

Cinnamon-throated Woodcreeper *Dendrozetetes rufigula*

Long-billed Woodcreeper *Nasica longirostris*

Black-banded Woodcreeper ♦ *Dendrocolaptes picumnus* The *olivaceous* race was seen twice.

Strong-billed Woodcreeper *Xiphocolaptes promeropirhynchus*

Great Rufous Woodcreeper *Xiphocolaptes major*

Ocellated Woodcreeper *Xiphorhynchus ocellatus*

Buff-throated Woodcreeper *Xiphorhynchus guttatus*

Olive-backed Woodcreeper *Xiphorhynchus triangularis*

Straight-billed Woodcreeper *Dendroplex picus*

Red-billed Scythebill *Campylorhamphus trochilirostris*

Narrow-billed Woodcreeper *Lepidocolaptes angustirostris*

Montane Woodcreeper *Lepidocolaptes lacrymiger*

Inambari Woodcreeper ♦ *Lepidocolaptes fatimalimae* Repeated great looks in the Machariapo Valley.

Plain Xenops *Xenops genibarbis*

Streaked Xenops *Xenops rutilans*

Rock Earthcreeper ♦ *Ochetorhynchus andaecola* One was seen at Cerro Tunari near Cochabamba.

Streaked Tuftedcheek *Pseudocolaptes boissonneautii*

Bolivian Earthcreeper ♦ *Tarphonomus harterti* We were lucky to get superb looks of a pair this year!

Rufous Hornero *Furnarius rufus*

Sharp-tailed Streamcreeper *Lochmias nematura* heard-only

Wren-like Rushbird *Phleocryptes melanops*

Buff-breasted Earthcreeper ♦ (Plain-breasted E) *Upucerthia [validirostris] jelskii* It was seen very well near Quime.

Cream-winged Cinclodes *Cinclodes albiventris*

White-winged Cinclodes *Cinclodes atacamensis*

Buff-browed Foliage-gleaner *Syndactyla rufosuperciliata*

Bolivian Recurvebill ♦ *Syndactyla striata* Endemic. One was seen at Los Volcanes and one near Apolo. Wow!

Buff-fronted Foliage-gleaner *Dendroma rufa*

Eastern Woodhaunter *Automolus subulatus*

Striped Treehunter ♦ *Thripadectes holostictus* One was seen along the old Coroico (death) Road.

Pearled Treerunner *Margarornis squamiger*

Tawny Tit-Spinetail ♦ *Sylviorthorhynchus yanacensis* Our best looks were at Cerro Tunari.

Brown-capped Tit-Spinetail ♦ *Leptasthenura fuliginiceps* Commonly encountered.

Streak-fronted Thornbird *Phacellodomus striaticeps* Two were seen in the Mizque Valley.

Spot-breasted Thornbird ♦ *Phacellodomus maculipectus* Several great looks at Quirusillas.

Greater Thornbird *Phacellodomus ruber*

Rusty-vented Canastero *Asthenes dorbignyi*

Berlepsch's Canastero ♦ *Asthenes berlepschi* Endemic. It took some time, but we eventually saw one near Sorata.

Scribble-tailed Canastero ♦ *Asthenes maculicauda* We got superb looks near La Cumbre.

Streak-backed Canastero *Asthenes wyatti*

Cordilleran Canastero *Asthenes modesta*

Black-throated Thistletail ♦ *Asthenes harterti* Endemic. We saw both races. Nominated along the Coroico road and *bejaraoni* near Siberia.

Maquis Canastero ♦ *Asthenes heterura* One was seen at Cerro Tunari.

Plain Softtail ♦ *Thripophaga fusciceps* The local form seen very well near Trinidad.

Light-crowned Spinetail ♦ (Buffy-crowned S) *Cranioleuca [albiceps] discolor* We had good looks in the Siberia area.

Rusty-backed Spinetail *Cranioleuca vulpina*

Stripe-crowned Spinetail *Cranioleuca pyrrhophia*

Bolivian Spinetail ♦ *Cranioleuca henricae* Endemic. We had excellent looks of this special one in its lichen and tillandsia covered habitat. **VU**

Grey-crested Cacholote *Pseudoseisura unirufa*

Yellow-chinned Spinetail *Certhiaxis cinnamomeus*

Chotoy Spinetail *Schoeniophylax phryganophilus*

Ochre-cheeked Spinetail ♦ *Synallaxis scutate* It was seen several times at Los Volcanes.

Plain-crowned Spinetail *Synallaxis gujanensis* heard-only

Cabanis's Spinetail ♦ *Synallaxis cabanisi* We had excellent looks near Apolo on the extension.

Sooty-fronted Spinetail *Synallaxis frontalis*

Azara's Spinetail *Synallaxis azarae*

Azara's Spinetail ♦ (Buff-browed S) *Synallaxis [azarae] samaipatae* It was seen well at Quirusillas.

Black-throated Antbird *Myrmophylax atrothorax*

Spot-winged Antshrike *Pygoptila stellaris*

Pygmy Antwren *Myrmotherula brachyura*

Amazonian Streaked Antwren *Myrmotherula multostriata*

Stripe-chested Antwren *Myrmotherula longicauda* leader only

Long-winged Antwren *Myrmotherula longipennis* The *garbei* race was seen near Riberalta on the extension.

Grey Antwren *Myrmotherula menetriesii* heard-only

Rusty-backed Antwren *Formicivora rufa*

Black-capped Antwren *Herpsilochmus atricapillus*

Rusty-winged Antwren *Herpsilochmus frater* heard-only

Plain Antvireo *Dysithamnus mentalis*

Barred Antshrike *Thamnophilus doliatus*

Chestnut-backed Antshrike *Thamnophilus palliatus*

Plain-winged Antshrike *Thamnophilus schistaceus* heard-only

Upland Antshrike ♦ *Thamnophilus aroyae* It was first seen in the Chairó Valley and later on the extension.

Bolivian Slaty Antshrike ♦ *Thamnophilus sticturus* We got great looks near Trinidad.

Amazonian Antshrike *Thamnophilus amazonicus*

Variable Antshrike ♦ (Andean A) *Thamnophilus [caerulescens] aspersiventer* A male was seen below Charazani on the extension.

Variable Antshrike ♦ (Chaco A) *Thamnophilus [caerulescens] dinellii* We had great looks at Quirusillas.

Rufous-capped Antshrike *Thamnophilus ruficapillus*

Great Antshrike *Taraba major*

Giant Antshrike ♦ *Batara cinerea* heard-only

Black-spotted Bare-eye *Phlegopsis nigromaculata*

Striated Antbird *Drymophila devillei* It was seen by some on the extension near Apolo. A write-in!

Peruvian Warbling Antbird *Hypocnemis peruviana*

Blackish Antbird *Cercomacroides nigrescens*

Riparian Antbird *Cercomacroides fuscicauda*

Grey Antbird *Cercomacra cinerascens*

Mato Grosso Antbird ♦ *Cercomacra melanaria* A last minute encounter with a pair near Trinidad.

White-browed Antbird *Myrmoborus leucophrys*

Band-tailed Antbird *Hypocnemoides maculicauda*

Plumbeous Antbird *Myrmelastes hyperythrus*

Western Fire-eye *Pyriglena maura*

Black-faced Antthrush *Formicarius analis* One was seen near Riberalta on the extension.

Short-tailed Antthrush ♦ *Chamaeza campanisona* Great looks at Los Volcanes.

Barred Antthrush ♦ *Chamaeza mollissima* heard-only

White-throated Antpitta ♦ *Grallaria albigula* Fantastic looks at Quirusillas!

Bolivian Antpitta ♦ *Grallaria cochabambae* Endemic. Shy bird but we got to see it along the Chapare Road.

Rufous-faced Antpitta ♦ *Grallaria erythrotis* It was tracked down at Siberia. Not ideal weather conditions!

Masked Antpitta ♦ *Hylopezus auricularis* Endemic. Fantastic looks near Riberalta on the extension. **VU**

Slaty Gnateater ♦ *Conopophaga ardesiaca* Repeated great looks at Los Volcanes.

Puna Tapaculo *Scytalopus simonsi*

Diademed Tapaculo ♦ *Scytalopus schulenbergi* Despite mist we got great looks on the Coroico (death) Road.

Trilling Tapaculo *Scytalopus parvirostris*

Bolivian Tapaculo ♦ *Scytalopus bolivianus* One was seen well at Los Volcanes.

Olive-crowned Crescentchest ♦ *Melanopareia maximiliani* Stunning bird seen well in dry habitat near Siberia.

Wing-barred Piprites *Piprites chloris*

Yungas Tyrannulet ♦ *Phyllomyias weedeni* A party of three were seen very well near Apolo on the extension. **VU**

Sclater's Tyrannulet *Phyllomyias sclateri*

Tawny-rumped Tyrannulet *Phyllomyias uropygialis*

Yellow-crowned Tyrannulet *Tyrannulus elatus*

Forest Elaenia *Myiopagis gaimardii*

Yellow-bellied Elaenia *Elaenia flavogaster*

White-crested Elaenia *Elaenia albicepsstraw*

Small-billed Elaenia *Elaenia parvirostris*

Slaty Elaenia ♦ *Elaenia strepera* leader only

Mottle-backed Elaenia *Elaenia gigas* One was seen below Charazani on the extension. It was a write-in.

Plain-crested Elaenia *Elaenia cristata*

Lesser Elaenia *Elaenia chiriquensis*

Highland Elaenia *Elaenia obscura*

Sierran Elaenia *Elaenia pallatangae*

White-lored Tyrannulet *Ornithion inerme*

Southern Beardless Tyrannulet *Camptostoma obsoletum*

White-throated Tyrannulet *Mecocerculus leucophrys*

Buff-banded Tyrannulet ♦ *Mecocerculus hellmayri* We had repeated excellent looks, the best was at Siberia.

White-banded Tyrannulet *Mecocerculus stictoapterus*

Yellow-billed Tit-Tyrant *Anairetes flavirostris*

Tufted Tit-Tyrant *Anairetes parulus*

Torrent Tyrannulet *Serpophaga cinerea*

White-crested Tyrannulet ♦ (White-bellied T) *Serpophaga [subcristata] munda* One was seen at Quirusillas.

Southern Mouse-colored Tyrannulet *Nesotriccus murinus*

Rufous-sided Scrub Tyrant ♦ (R-s Pygmy T) *Euscarthmus rufomarginatus* One was seen near Riberalta on the extension.

Greater Wagtail-Tyrant ♦ *Stigmatura budytoides* We had excellent look in the Mizque Valley.

Bolivian Tyrannulet ♦ *Zimmerius bolivianus* We had our best looks along the old Coroico (death) road.

Mottle-cheeked Tyrannulet *Phylloscartes ventralis*

Streak-necked Flycatcher *Mionectes striaticollis*

McConnell's Flycatcher *Mionectes macconnelli*

Sepia-capped Flycatcher *Leptopogon amaurocephalus*

Slaty-capped Flycatcher *Leptopogon superciliaris*

Southern Scrub Flycatcher *Sublegatus modestus*

Plain Inezia ♦ *Inezia inornata* Just a few were noted around Trinidad.

Bran-colored Flycatcher *Myiophobus fasciatus*

Many-colored Rush Tyrant *Tachuris rubrigastra*

Yungas Tody-Tyrant ♦ *Hemitriccus spodiops* Fairly common around Apolo and we had excellent looks!

Flammulated Pygmy-Tyrant ♦ *Hemitriccus flammulatus* One was seen near Riberalta on the extension.

Johannes's Tody-Tyrant *Hemitriccus iohannis*

Pearly-vented Tody-Tyrant *Hemitriccus margaritaceiventer*

Buff-throated Tody-Tyrant *Hemitriccus ruficularis* heard-only

White-bellied Pygmy Tyrant ♦ *Myiornis albiventris* First seen at Los Volcanes and also seen in the Machariapu Valley.

Short-tailed Pygmy Tyrant *Myiornis ecaudatus*

Ochre-faced Tody-Flycatcher *Poecilotriccus plumbeiceps*

Spotted Tody-Flycatcher *Todirostrum maculatum*

Common Tody-Flycatcher *Todirostrum cinereum*

Yellow-browed Tody-Flycatcher *Todirostrum chrysocrotaphum*

Western Olivaceous Flatbill *Rhynchocyclus brevirostris* One was seen near Riberalta on the extension.

Yellow-olive Flatbill *Tolmomyias sulphurescens*

Yellow-margined Flatbill *Tolmomyias assimilis*

Olive-faced Flatbill *Tolmomyias viridiceps*

Cinnamon Flycatcher *Pyrrhomyias cinnamomeus*

Cliff Flycatcher *Hirundinea ferruginea*

Euler's Flycatcher *Lathrotriccus euleri*

Fuscous Flycatcher ♦ (Bolivian F F) *Cnemotriccus [fuscatus] bimaculatus* non-leader

Black Phoebe *Sayornis nigricans*

Smoke-colored Pewee *Contopus fumigatus* heard-only

Western Wood Pewee *Contopus sordidulus*

Eastern Wood Pewee *Contopus virens*

Scarlet Flycatcher *Pyrocephalus rubinus*

Yellow-browed Tyrant *Satrapa icterophrys*

Spot-billed Ground Tyrant *Muscisaxicola maculirostris*

White-fronted Ground Tyrant ◊ *Muscisaxicola albifrons* Several were seen at high altitude. Best looks were at La Cumbre near La Paz.

Cinereous Ground Tyrant ◊ *Muscisaxicola cinereus* Two were seen on the way to Quime.

Rufous-naped Ground Tyrant *Muscisaxicola rufivertex*

White-browed Ground Tyrant *Muscisaxicola albilora*

Taczanowski's Ground Tyrant ◊ *Muscisaxicola griseus* Three were seen near Quime. It was a write-in!

Puna Ground Tyrant *Muscisaxicola juninensis*

Andean Negrito *Lessonia oreas*

Plumbeous Tyrant ◊ *Knipolegus cabanisi* We had many sightings at Siberia this year!

White-winged Black Tyrant *Knipolegus aterrimus*

Hudson's Black Tyrant ◊ *Knipolegus hudsoni* Three were seen around Trinidad.

White-rumped Monjita *Xolmis velatus*

White Monjita *Xolmis irupero*

Grey Monjita *Nengetus cinereus*

Streak-throated Bush Tyrant *Myiotheretes striaticollis*

Rufous-bellied Bush Tyrant ◊ *Myiotheretes fusciorufus* Unusually many sightings this year both at Siberia and along the Chapare road.

Black-backed Water Tyrant *Fluvicola albiventer*

White-headed Marsh Tyrant *Arundinicola leucocephala*

Maroon-belted Chat-Tyrant *Ochthoeca thoracica*

Rufous-breasted Chat-Tyrant *Ochthoeca rufipectoralis*

Cattle Tyrant *Machetornis rixosa*

Piratic Flycatcher *Legatus leucophaeus*

Rusty-margined Flycatcher *Myiozetetes cayanensis*

Social Flycatcher *Myiozetetes similis*

Grey-capped Flycatcher *Myiozetetes granadensis*

Lemon-browed Flycatcher *Conopias cinchoneti* Very rare bird, probably the third record for Bolivia was seen along the Chairó road.

Great Kiskadee *Pitangus sulphuratus*

Lesser Kiskadee *Philohydor lictor*

Golden-crowned Flycatcher *Myiodynastes chrysocephalus*

Sulphur-bellied Flycatcher *Myiodynastes luteiventris*

Streaked Flycatcher *Myiodynastes maculatus*

Boat-billed Flycatcher *Megarynchus pitangua*

Variegated Flycatcher *Empidonomus varius*

Crowned Slaty Flycatcher *Griseotyrannus aurantioatrocristatus*

Tropical Kingbird *Tyrannus melancholicus*

Fork-tailed Flycatcher *Tyrannus savana*

Eastern Kingbird *Tyrannus tyrannus*

White-rumped Sirystes ♦ *Sirystes albocinereus* Two pairs were seen in the Machariapu Valley on the extension.

Rufous Casiornis *Casiornis rufus*

Dusky-capped Flycatcher *Myiarchus tuberculifer*

Swainson's Flycatcher *Myiarchus swainsoni* Several sightings around Riberalta.

Short-crested Flycatcher *Myiarchus ferox*

Brown-crested Flycatcher *Myiarchus tyrannulus*

Cinnamon Attila *Attila cinnamomeus* One was seen near Riberalta on the extension.

White-eyed Attila *Attila bolivianus*

Bright-rumped Attila *Attila spadiceus* heard-only

Barred Fruiteater *Pipreola arcuata*

Andean Cock-of-the-rock *Rupicola peruvianus*

White-tipped Plantcutter *Phytotoma rutila*

Palkachupa Cotinga ♦ *Phibalura boliviana* Endemic. Excellent looks near Apolo. A real highlight of the tour and the main target of our extension! **EN**

Red-crested Cotinga *Ampelion rubrocristatus*

Chestnut-crested Cotinga ♦ *Ampelion rufaxilla* We had excellent looks of this scarce bird along the old Coroico (death) road.

Amazonian Umbrellabird *Cephalopterus ornatus*

Screaming Piha *Lipaugus vociferans*

Scimitar-winged Piha ♦ *Lipaugus uropygialis* Another major target of the tour and after hard work we all got great looks of this near-endemic species along the old Coroico (death) road. **VU**

Bare-necked Fruitcrow *Gymnoderus foetidus*

Sulphur-bellied Tyrant-Manakin ♦ *Neopelma sulphureiventer* We had repeated good looks near Trinidad.

Yungas Manakin ♦ *Chiroxiphia boliviana* First seen well at Los Volcanes.

Band-tailed Manakin *Pipra fasciicauda*

Fiery-capped Manakin *Machaeropterus pyrocephalus*

Round-tailed Manakin *Ceratopipra chloromeros*

Ruddy-tailed Flycatcher *Terenotriccus erythrurus*

Black-tailed Tityra *Tityra cayana*

Masked Tityra *Tityra semifasciata*

Barred Becard *Pachyramphus versicolor*

Chestnut-crowned Becard *Pachyramphus castaneus*

White-winged Becard *Pachyramphus polychopterus*

Black-capped Becard *Pachyramphus marginatus*

Rufous-browed Peppershrike *Cyclarhis gujanensis* heard-only

Lemon-chested Greenlet *Hylophilus thoracicus*

Dusky-capped Greenlet *Pachysylvia hypoxantha*

Yellow-green Vireo *Vireo flavoviridis*

Chivi Vireo *Vireo chivi*

Brown-capped Vireo *Vireo leucophrys*

White-collared Jay ♦ *Cyanolyca viridicyanus* It was seen along the Chapare and Coroico roads.

Purplish Jay *Cyanocorax cyanomelas*

Plush-crested Jay *Cyanocorax chrysops*

Sand Martin *Riparia riparia*

White-rumped Swallow *Tachycineta leucorrhoa*

White-winged Swallow *Tachycineta albiventer*

Blue-and-white Swallow *Pygochelidon cyanoleuca*

Tawny-headed Swallow *Alopochelidon fucata* We saw eight near Trinidad. It was a write-in.

Pale-footed Swallow ♦ *Orochelidon flavipes* We had good looks at Siberia and along the Chapare road.

Brown-bellied Swallow *Orochelidon murina*

Andean Swallow ♦ *Orochelidon andecola* Several great looks at high altitude.

Southern Rough-winged Swallow *Stelgidopteryx ruficollis*

Brown-chested Martin *Progne tapera*

Southern Martin *Progne elegans*

Grey-breasted Martin *Progne chalybea*

Barn Swallow *Hirundo rustica*

American Cliff Swallow *Petrochelidon pyrrhonota*

Black-capped Donacobius *Donacobius atricapilla*

Thrush-like Wren *Campylorhynchus turdinus*

Fulvous Wren ♦ *Cinnycerthia fulva* We had nice looks along the Chapare road.

Moustached Wren *Pheugopedius genibarbis*

Fawn-breasted Wren ♦ *Cantorchilus guarayanus* Common.

House Wren *Troglodytes aedon*

Mountain Wren *Troglodytes solstitialis*

Grey-breasted Wood Wren *Henicorhina leucophrys* heard-only

Masked Gnatcatcher *Polioptila dumicola*

Chalk-browed Mockingbird *Mimus saturninus*

Brown-backed Mockingbird ◊ *Mimus dorsalis* A pair was seen on our drive to Cochabamba.

Andean Solitaire *Myadestes ralloides*

White-eared Solitaire ◊ *Entomodestes leucotis* It was seen at Siberia, along the Chapare and Coroico roads.

Swainson's Thrush *Catharus ustulatus*

Chiguanco Thrush *Turdus chiguanco*

Andean Slaty Thrush ◊ *Turdus nigriceps* Excellent looks at Siberia despite the mist.

Glossy-black Thrush *Turdus serranus*

Great Thrush *Turdus fuscater*

Creamy-bellied Thrush *Turdus amaurochalinus*

Black-billed Thrush *Turdus ignobilis*

White-necked Thrush *Turdus albicollis*

Pale-breasted Thrush *Turdus leucomelas*

Hauxwell's Thrush *Turdus hauxwelli*

Rufous-bellied Thrush *Turdus rufiventris*

White-capped Dipper *Cinclus leucocephalus*

House Sparrow (introduced) *Passer domesticus*

Yellowish Pipit *Anthus chii*

Puna Pipit ◊ *Anthus brevirostris* One was seen at Cerro Tunari by some.

Yellow-bellied Siskin *Spinus xanthogastrus*

Hooded Siskin *Spinus magellanicus*

Black Siskin *Spinus atratus*

Golden-rumped Euphonia *Chlorophonia cyanocephala*

Blue-naped Chlorophonia *Chlorophonia cyanea*

Purple-throated Euphonia *Euphonia chlorotica*

White-lored Euphonia *Euphonia chrysopasta*

Thick-billed Euphonia *Euphonia laniirostris*

Bronze-green Euphonia *Euphonia mesochrysa*

Common Chlorospingus *Chlorospingus flavopectus*

Grassland Sparrow *Ammodramus humeralis*

Yellow-browed Sparrow *Ammodramus aurifrons*

White-browed Brushfinch ♦ *Arremon torquatus* A singleton was seen at Quirusillas.

Moss-backed Sparrow ♦ *Arremon flavirostris* Two were seen near Samaipata.

Rufous-collared Sparrow *Zonotrichia capensis*

Bolivian Brushfinch ♦ *Atlapetes rufinucha* Endemic. We had repeated excellent looks, first at Siberia.

White-browed Blackbird *Leistes superciliaris*

Yellow-billed Caciue *Amblycercus holosericeus* A pair was seen along the Chapare road. It was a write-in.

Russet-backed Oropendola *Psarocolius angustifrons*

Dusky-green Oropendola *Psarocolius atrovirens*

Green Oropendola *Psarocolius viridis*

Crested Oropendola *Psarocolius decumanus*

Olive Oropendola *Psarocolius bifasciatus*

Solitary Caciue *Cacicus solitarius*

Golden-winged Caciue *Cacicus chrysopterus*

Yellow-rumped Caciue *Cacicus cela*

Orange-backed Troupial *Icterus croconotus*

Variable Oriole *Icterus pyrrhopterus*

Giant Cowbird *Molothrus oryzivorus*

Screaming Cowbird ♦ *Molothrus rufoaxillaris* It was seen twice near Trinidad.

Shiny Cowbird *Molothrus bonariensis*

Velvet-fronted Grackle ♦ *Lamprosar tanagrinus* Big flocks were seen near Trinidad.

Scarlet-headed Blackbird *Amblyramphus holosericeus*

Chopi Blackbird *Gnorimopsar chopi*

Bolivian Blackbird ♦ *Oreopsar bolivianus* Endemic. It was common in the Mizque Valley but seen elsewhere too.

Greyish Baywing (Bay-winged Cowbird) *Agelaioides badius*

Yellow-winged Blackbird *Agelasticus thilius*

Unicolored Blackbird *Agelasticus cyanopus*

Southern Yellowthroat *Geothlypis velata*

Tropical Parula *Setophaga pitiayumi*

Citrine Warbler *Myiothlypis luteoviridis*

Pale-legged Warbler *Myiothlypis signata*

Buff-rumped Warbler *Myiothlypis fulvicauda* One was seen below Charazani on the extension.

Riverbank Warbler *Myiothlypis rivularis* A pair was seen along the Chairó road.

Two-banded Warbler *Myiothlypis bivittata*

Golden-crowned Warbler *Basileuterus culicivorus*

Yungas Warbler ♦ ***Basileuterus punctipectus*** A single individual was seen along the old Coroico road.

Slate-throated Whitestart *Myioborus miniatus*

Brown-capped Whitestart ♦ ***Myioborus brunnicaps*** Common.

Spectacled Whitestart *Myioborus melanocephalus*

Scarlet Tanager *Piranga olivacea*

White-winged Tanager *Piranga leucoptera*

Black-backed Grosbeak *Pheucticus aureoventris*

Ultramarine Grosbeak *Cyanoloxia brissonii*

Plushcap *Catamblyrhynchus diadema*

Hooded Tanager *Nemosia pileata*

Pampa Finch *Embernagra platensis*

Wedge-tailed Grass Finch *Emberizoides herbicola*

Mourning Sierra Finch *Rhopospina fruticeti*

Band-tailed Sierra Finch *Rhopospina alaudina*

Green Honeycreeper (E no stars) *Chlorophanes spiza*

Guira Tanager *Hemithraupis guira*

Swallow Tanager *Tersina viridis*

Purple Honeycreeper *Cyanerpes caeruleus*

Red-legged Honeycreeper *Cyanerpes cyaneus*

Blue Dacnis *Dacnis cayana*

Black-faced Dacnis *Dacnis lineata*

Black-throated Saltator *Saltatoricula atricollis*

Bluish-grey Saltator *Saltator coerulescens*

Buff-throated Saltator *Saltator maximus*

Golden-billed Saltator *Saltator aurantiirostris*

Bananaquit *Coereba flaveola*

Dull-colored Grassquit *Asemospiza obscura*

Blue-black Grassquit *Volatinia jacarina*

Grey-headed Tanager *Eucometis penicillata*

Black-goggled Tanager *Trichothraupis melanops*

Inti Tanager ♦ *Heliotraupis oneilli* heard-only

Flame-crested Tanager *Loriotus cristatus*

Red Pileated Finch *Coryphospingus cucullatus*

Silver-beaked Tanager *Ramphocelus carbo*

Yellow-bellied Seedeater *Sporophila nigricollis*

Double-collared Seedeater *Sporophila caerulescens*

Rusty-collared Seedeater *Sporophila collaris*

White-bellied Seedeater ♦ *Sporophila leucoptera* Several were seen around Trinidad. This is the *bicolor* race.

Bolivian Warbling Finch ♦ *Poospiza boliviana* We could observe a pair at Cerro Tunari as long as we wanted!

Black-and-chestnut Warbling Finch *Poospiza whittii*

Cochabamba Mountain Finch ♦ *Poospiza garleppi* Endemic. About 10 were seen at Cerro Tunari. Beautiful!

Orange-browed Hemispingus ♦ *Kleinotheraupis calophrys* It was difficult to find this year! Eventually a party of three were seen along the Chapare road.

Orange-headed Tanager *Thlypopsis sordida*

Rust-and-yellow Tanager *Thlypopsis ruficeps*

Superciliaried Hemispingus *Thlypopsis superciliaris*

Long-tailed Reed Finch ♦ *Donacospiza albifrons* Two were seen near Trinidad. The Bolivian population is highly disjunct however the species is monotypic.

White-rumped Tanager ♦ *Cypsnagra hirundinacea* We got fantastic looks near Riberalta on the extension.

Rufous-sided Warbling Finch *Pospizopsis hypocondria*

Rusty-browed Warbling Finch ♦ *Microspingus erythrophrys* A pair was seen near Siberia.

Ringed Warbling Finch *Microspingus torquatus*

Black-capped Warbling Finch *Microspingus melanoleucus*

Chestnut-vented Conebill *Conirostrum speciosum*

Capped Conebill *Conirostrum albifrons*

Giant Conebill ♦ *Conirostrum binghami* Absolutely fantastic looks at Cerro Tunari!

Blue-backed Conebill *Conirostrum sitticolor*

Cinereous Conebill *Conirostrum cinereum*

Saffron Finch *Sicalis flaveola*

Greenish Yellow Finch *Sicalis olivascens*

Black-hooded Sierra Finch *Phrygilus atriceps*

Peruvian Sierra Finch *Phrygilus punensis*

Ash-breasted Sierra Finch *Geospizopsis plebejus*

Plumbeous Sierra Finch *Geospizopsis unicolor*

Glacier Finch ♦ (White-winged Diuca F) *Idiopsar speculifer* A few were seen near Quime and at La Cumbre.

Band-tailed Seedeater *Catamenia analis*

Plain-colored Seedeater *Catamenia inornata*

Masked Flowerpiercer *Diglossa cyanea*

Rusty Flowerpiercer *Diglossa sittoides*

Grey-bellied Flowerpiercer ♦ *Diglossa carbonaria* Multiplied great looks of this near-endemic bird! It was recently found in Peru but used to be an endemic bird to Bolivia.

Black-throated Flowerpiercer *Diglossa brunneiventris*

Fawn-breasted Tanager *Pipraeidea melanonota*

Blue-and-yellow Tanager *Rauenia bonariensis*

Rufous-bellied Mountain Tanager ♦ *Pseudosaltator rufiventris* Special bird which we saw easily at Cerro Tunari.

Chestnut-bellied Mountain Tanager *Dubusia castaneiventris*

Hooded Mountain Tanager *Buthraupis montana*

Blue-capped Tanager *Sporathraupis cyanocephala*

Blue-winged Mountain Tanager *Anisognathus somptuosus* The *flavinucha* race we saw is sometimes considered a separate species 'Bolivian' Blue-winged Mountain Tanager.

Scarlet-bellied Mountain Tanager *Anisognathus igniventris* It was regularly seen on the tour. This is the nominate race which is sometimes called Fire-bellied Mountain Tanager (south of Junin in Peru).

Grey-crested Finch ♦ *Lophospingus griseocristatus* We got great looks in the Mizque Valley.

Magpie Tanager *Cissopis leverianus*

Black-faced Tanager *Schistochlamys melanopis*

Red-crested Cardinal *Paroaria coronata*

Red-capped Cardinal *Paroaria gularis*

Yellow-bellied Tanager *Ixothraupis xanthogastra*

Golden-naped Tanager *Chalcothraupis ruficervix* Two males were seen below Charazani by some. This is the *fulvicervix* race, sometimes called Rusty-naped Tanager.

Blue-grey Tanager *Thraupis episcopus*

Sayaca Tanager *Thraupis sayaca*

Palm Tanager *Thraupis palmarum*

Straw-backed Tanager ♦ *Stilpnia argyrofenges* A pair was seen at Quirusillas and three at Siberia. VU

Blue-necked Tanager *Stilpnia cyanicollis*

Masked Tanager *Stilpnia nigrocincta*

Green-capped Tanager ♦ *Stilpnia meyerdeschauenseei* A pair was seen near Apolo. Yet another main target of the extension, and a difficult-to-find bird, so it was great to see it well!

Blue-and-black Tanager *Tangara vassorii*

Bay-headed Tanager *Tangara gyrola*

Saffron-crowned Tanager *Tangara xanthocephala*

Turquoise Tanager *Tangara mexicana*

Paradise Tanager *Tangara chilensis*

MAMMALS

Spectacled Slender Opossum ♦ *Marmosops ocellatus* One was seen and photographed at Los Volcanes.

Giant Anteater ♦ *Myrmecophaga tridactyla* What an amazing creature! We saw one coming to a waterhole at dusk near Trinidad. Certainly a tour highlight!

Southern Tamandua *Tamandua tetradactyla* Two were seen near Trinidad.

Crab-eating Fox (Common Zorro) *Cerdocyon thous* Excellent looks of one at a water-hole.

Culpeo (Colpeo Fox) *Lycalopex culpaeus* One was seen at Lake Titicaca.

South American Coati (Coati) *Nasua nasua* One was seen near Trinidad.

Crab-eating Raccoon *Procyon cancrivorus* A party of four were seen near Trinidad.

Bolivian River Dolphin ♦ *Inia boliviensis* Two were seen on the Rio Mamoré.

Black-capped Squirrel Monkey *Saimiri boliviensis*

Large-headed Capuchin *Sapajus macrocephalus* non-leader

Hooded Capuchin *Sapajus cay* Best views were at the Santa Cruz Botanical Garden.

Azara's Night Monkey (Southern N M) *Aotus azarae* Daytime and night time encounters. Brilliant!

White-eared Titi (Bolivian Grey T) *Plecturocebus donacophilus* Just three were seen near Trinidad on the extension.

Río Beni Titi ♦ *Plecturocebus modestus* Fantastic looks near Trinidad. Rare primate!

Bolivian Red Howler ♦ *Alouatta sara* Three were seen near Trinidad.

Azara's Agouti *Dasyprocta azarae* leader-only

Bicolored-spined Porcupine *Coendu bicolor* One was seen at Los Volcanes.

Brazilian Guinea Pig (Common Cavy) *Cavia aperea*

Montane Guinea Pig *Cavia tschudii*

Northern Mountain Cavy *Microcavia niata* Two were seen on the Altiplano by some.

Greater Capybara *Hydrochoerus hydrochaeris* Common.

Common Mountain Viscacha *Lagidium viscacia* We had our best looks towards Quime. Also seen on the Apolo extension.

Bolivian Squirrel *Sciurus ignites* Several sightings, first at Los Volcanes.

Southern Amazon Red Squirrel *Sciurus spadiceus* We had the best looks at the Santa Cruz Botanical Garden.

Southern Red Bat *Lasiurus blossevilli* One was seen flying at daytime (migrating?) up at 4400 meter above Quime.

Common Brown Brocket (Grey B) *Mazama gouazoubira* Seen very well in the Andes near Siberia.

Molina's Hog-nosed Skunk *Conepatus chinga* Two were seen at Siberia.
